

not attacker(success[]) in process 0.

GOAL
attacker(success[])

[clause 19]
then the message success[] may be sent to the
attacker at output {3}
=> attacker(success[])

premise (input {1})
If the message hash(nonce[],seed[]) is
received from the attacker at input {1}
attacker(hash(nonce[],seed[]))

[clause 23]
then the message hash(x_4,seed[]) may be sent
to the attacker at output {16}
=> attacker(hash(nonce[],seed[]))

premise (input {14})
the message secretcondition[] is received
from the attacker at input {14}
attacker(secretcondition[])

[clause 21]
The message secretcondition[] may be sent to
the attacker at output {8}.
=> attacker(secretcondition[])

premise (input {13})
If the message x_4 is received from the
attacker at input {13}
attacker(nonce[])

[clause 24]
The message nonce[] may be sent to the
attacker at output {17}.
=> attacker(nonce[])
